

Restoration and use of peatlands with GHG focus

Dear Colleagues, in connection with the dissertation October 27 by Sabine Jordan on ***Greenhouse Gas Emissions from Rewetted Extracted Peatlands in Sweden***, two activities are scheduled;

1. International seminar October 26

Wednesday October 26, 2016

14:00-16:30

University building (Undervisningshuset) room J

14:00-14:20 Restoration or after-use of finished peat cut-over areas; **Lars Lundin**, SLU, Sweden

14:20-14:50 Oil exploration and extraction in Canada's boreal region: Impacts and restoration on peatland ecosystems; **Maria Strack**, University of Waterloo, Canada

14:50-15:10 Coffee break (please send an email to sabine.jordan@slu.se if you would like to have coffee/tea and pastry).

15:10-15:40 Climate change impacts on the functioning of boreal fens; **Raija Laiho**, Luke, Finland

15:40-16:00 Greenhouse gas emissions from cultivated organic soils in Sweden; **Örjan Berglund**, SLU, Sweden

16:00-16:20 Different strategies for management of drained peatlands; business as usual, rewetting or harvesting and use of peat; **Mats Olsson**, SLU, Sweden

2. Dissertation October 27

PhD defence "Greenhouse gas emissions from rewetted extracted peatlands in Sweden" by Sabine Jordan (<http://pub.epsilon.slu.se/13697/>). Opponent: Maria Strack, University of Waterloo, Canada.

Thursday October 27, 2016

9:15

University building (Undervisningshuset) room L

We appreciate if you spread the information to other colleagues who might be interested.

With best regards,
Lars and Sabine
